

AI STRATEGY · SERVICE PROFILE

AI Consulting

Know where AI pays back in your business. Get a plan proven on your data that becomes a live system, not a slide deck.

10,000+ systems delivered for clients in 150+ countries — and we run our own 17-brand company on systems like this. You own everything we build.

PROVEN ON US

We run AI in production — WaSMS chatbots for 1,000+ businesses, an AI helpdesk, AI server operations. Which means our advice comes from operating AI, not slides.

01 · THE COST YOU PAY TODAY, AND THE FIX

WHAT IT COSTS YOU TODAY

A stalled AI plan costs you every month. Your budget drains into pilots that never reach production. Your staff keep doing work AI could handle. You buy tools that never fit. And the strategy deck nobody acts on cost real money to write.

WHAT YOU GET INSTEAD

You get a workflow assessment, a payback-ranked roadmap, and proof on your real data before you commit budget. We run AI in production ourselves, so the same team can build the plan. Which means budget goes to proven use cases — and you own a live system, not a document.

What you get

01

Find Where AI Pays Back

We map your workflows and data to rank use cases by payback — and flag the ones that won't. Which means your budget goes only where AI earns it.

02

Know What to Build First

You get a sequenced roadmap: order of build, data needs, timeline and budget for each step. Which means no guesswork on what it costs or when it lands.

03

Proof Before You Spend

We stress-test the riskiest assumption on your real data before you commit a build budget. Which means the business case is proven, not hoped for.

04

Know Your Data Is Ready

You get an honest read on data quality, security and access, plus the guardrails and human oversight AI needs. Which means no surprises after go-live.

05

No Lock-In, No Overspend

Independent advice on when an off-the-shelf tool is enough, when custom earns its cost, and how to avoid lock-in. Which means you never pay for more than you need.

06

From Plan to Live System

The team that wrote your roadmap can build and run it. Our builds have AI built in to cut overhead 40-70%. Which means your strategy never stalls at the report stage.

YOU OWN IT | Everything we build — code, data and IP — is yours. Which means no lock-in, ever.

02 · WHAT'S IN SCOPE

What's in scope

- ✓ AI opportunity assessment of your workflows
- ✓ Sequenced roadmap with timeline and budget
- ✓ Data quality and governance readiness review
- ✓ Security, privacy and human-oversight framework
- ✓ Use-case shortlist ranked by payback
- ✓ Proof of concept on your real data
- ✓ Independent build-vs-buy recommendation
- ✓ Executive briefing and delivery handoff plan

How you start

1

Free assessment

We map your problem and scope the first build. No cost, no obligation.

2

First build

Fixed scope, fixed timeline. Live in about 2–3 weeks.

3

Run

We operate, monitor and support it 24/7. You see it working under real use.

4

Expand

You add the next system when you're ready. Nothing forced.

Ways to engage

Fixed-Scope Build

Defined outcome, fixed timeline & price.

Dedicated Team

A senior squad that works as your own.

Staff Augmentation

Vetted engineers plugged into your team.

Managed Retainer

We build, run and evolve it for you.

03 · WHAT CHANGES FOR YOU

What you can expect

Your budget goes only to AI use cases proven to pay back — not novelty pilots

A sequenced path from idea to production, with no guesswork on timeline or cost

Confidence your data, security and governance can support AI before you build

One accountable partner from strategy to live system — no stall after the report

Products we run at scale

Common questions

We already have an AI strategy deck — why hire you?

Most decks stall at the recommendation stage. Ours is built to go straight to a delivery team — often our own. You get a roadmap that becomes a working system, not a document nobody opens again.

How long does the consulting take?

It depends on scope. Most assessments and roadmaps land in weeks, not months. Where feasibility is in doubt, we run a proof of concept in parallel on your real data.

Will you just tell us to build custom AI?

No. You get independent build-vs-buy advice. Sometimes an off-the-shelf tool or a simple automation is the right call. We say so even when it means a smaller job for us.

How do we start?

Start with a free assessment — no cost, no obligation. We show where AI pays back in your business. If you go ahead, a fixed-scope first build goes live in about 2-3 weeks. Then we run it and expand from there.

Book your free assessment

Free assessment → fixed-scope first build, live in ~2-3 weeks → run & expand.
