

ENTERPRISE SOFTWARE · SERVICE PROFILE

Business Systems & AI Automation

Cut your manual overhead 40–70%. One system, built around how you work, with AI inside — and you own the code, data and IP.

10,000+ systems delivered for clients in 150+ countries — and we run our own 17-brand company on systems like this. You own everything we build.

PROVEN ON US

rnaccounts, our own cloud ERP & POS, runs 140+ organisations every day. Which means your operations sit on patterns already proven at scale.

01 · THE COST YOU PAY TODAY, AND THE FIX

WHAT IT COSTS YOU TODAY

Every month, your team loses hours re-typing data between spreadsheets and tools that don't talk. Work slips through the gaps. Reports take days, and you still doubt the numbers. You pay salaries for copy-paste work — and the errors it creates cost you again.

WHAT YOU GET INSTEAD

You get one custom system built around how you actually operate, with AI doing the repetitive work. You own the code, the data and the IP. Which means your overhead drops 40–70%, work stops slipping through, and no vendor can ever lock you in.

What you get

01

One system runs everything

Operations, finance, inventory and people in one custom ERP, shaped to how you work. Which means no more juggling separate tools to finish one job.

02

Repetitive work disappears

Approvals, hand-offs and routine steps run themselves, with AI built in. Which means 40–70% less manual overhead and no more waiting on bottlenecks.

03

Answers from your documents

AI agents read your files and answer with sources, grounded in your data. Which means your team finds the right fact in seconds, not hours.

04

Numbers you can trust

All your data unified into one source of truth, with live dashboards. Which means leadership decides on today's facts, not last month's guesswork.

05

Keep the tools you use

200+ ready integrations, plus custom APIs where you need them. Which means you keep what works and drop the double entry.

06

Your data stays yours

Private, self-hosted AI deployed inside your own infrastructure. Which means sensitive data never leaves your environment.

YOU OWN IT | Everything we build — code, data and IP — is yours. Which means no lock-in, ever.

02 · WHAT'S IN SCOPE

What's in scope

- ✓ Discovery workshop mapping your real processes
- ✓ Full build, testing & deployment
- ✓ Training & documentation for your team
- ✓ Security review & hardening before launch
- ✓ System design & architecture around your workflows
- ✓ Data migration from your existing tools
- ✓ Full source-code, data & IP ownership
- ✓ Optional 24/7 monitoring & support after launch

How you start

1

Free assessment

We map your problem and scope the first build. No cost, no obligation.

2

First build

Fixed scope, fixed timeline. Live in about 2–3 weeks.

3

Run

We operate, monitor and support it 24/7. You see it working under real use.

4

Expand

You add the next system when you're ready. Nothing forced.

Ways to engage

Fixed-Scope Build

Defined outcome, fixed timeline & price.

Dedicated Team

A senior squad that works as your own.

Staff Augmentation

Vetted engineers plugged into your team.

Managed Retainer

We build, run and evolve it for you.

03 · WHAT CHANGES FOR YOU

What you can expect

Manual overhead cut 40–70% as AI takes over the repetitive work

One source of truth — every team works from the same numbers

Faster decisions, made on data you actually trust

A system you own outright — no per-seat fees, no vendor lock-in

Products we run at scale

Common questions

Do we own the code?

Yes. You own the source code, the data and the IP on every engagement. You can take it in-house or to another vendor at any time. No lock-in, no black boxes.

Can the AI run on our own servers?

Yes. Where privacy or data sovereignty matters, we deploy private, self-hosted models inside your infrastructure. Your data never leaves your environment.

Will it work with the tools we already use?

In most cases, yes. You get 200+ ready integrations, and we build custom APIs where something is missing. Your team keeps familiar tools while the double entry goes away.

How do we start?

With a free assessment of your current processes — no cost, no obligation. Then a fixed-scope first build goes live in about 2–3 weeks, so there is no surprise bill. After launch, we run it and expand it with you.

Book your free assessment

Free assessment → fixed-scope first build, live in ~2–3 weeks → run & expand.
