

DEDICATED ENGINEERING SQUADS · SERVICE PROFILE

Dedicated Development Teams

Get one accountable senior squad — engineering, QA, DevOps — building your roadmap. No hiring, no restarts when people leave. You own the code and IP from day one.

10,000+ systems delivered for clients in 150+ countries — and we run our own 17-brand company on systems like this. You own everything we build.

PROVEN ON US

Your squad comes from teams that ship and operate our own products daily. Which means they have done this before.

01 · THE COST YOU PAY TODAY, AND THE FIX

WHAT IT COSTS YOU TODAY

Every month spent hiring is a month your roadmap stands still. Freelancers leave before they learn your product. Each departure resets delivery, wastes paid-for knowledge, and leaves the risk and IP exposure on you. You carry the management load too — on top of running the business.

WHAT YOU GET INSTEAD

You get one complete squad: senior engineers, QA, DevOps, and a technical project manager. The same people stay on your product for years. We handle hiring, management, and retention. Which means delivery compounds instead of resetting — and you keep the roadmap, code, and IP from day one.

What you get

01

Fewer Costly Rebuilds

Senior engineers own your architecture and review every line. Which means decisions hold up as you scale, and you avoid the rewrite that kills roadmaps.

02

Bugs Caught Before Customers Do

QA and DevOps sit inside the squad from day one, with automated tests, CI/CD, and 24/7 monitoring. Which means fewer production failures and no expensive bolt-on later.

03

AI Skills Without Extra Hires

Engineers skilled in private AI, document intelligence, and data-heavy systems sit inside your squad. Which means AI features ship without a second vendor or extra hires.

04

Delivery You Can Plan Around

A technical project manager runs sprints and reporting under a formal SLA. Which means you always know what ships next — delivery is a commitment, not a hope.

05

Your Data Stays Protected

Access control, code-review gates, and confidentiality agreements come standard. Which means enterprise-grade governance without hiring a security team yourself.

06

You Own Everything, Always

Every repository, decision record, and deployment artifact belongs to you from day one. Which means no vendor lock-in — you can walk away with everything and lose nothing.

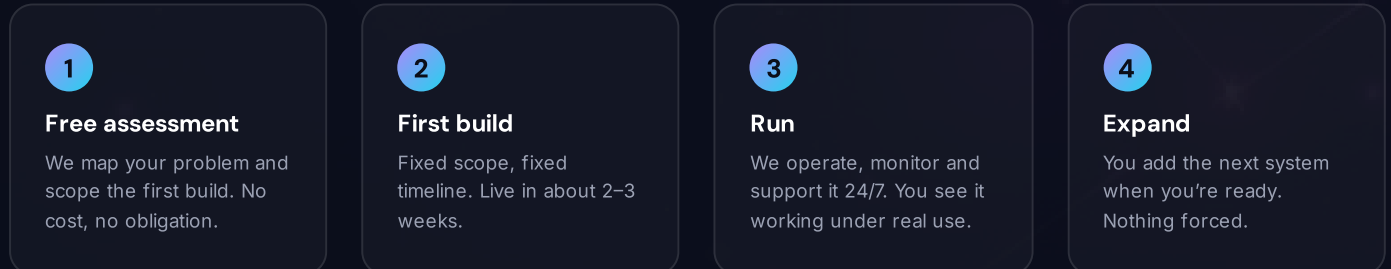

YOU OWN IT | Everything we build — code, data and IP — is yours. Which means no lock-in, ever.

02 · WHAT'S IN SCOPE

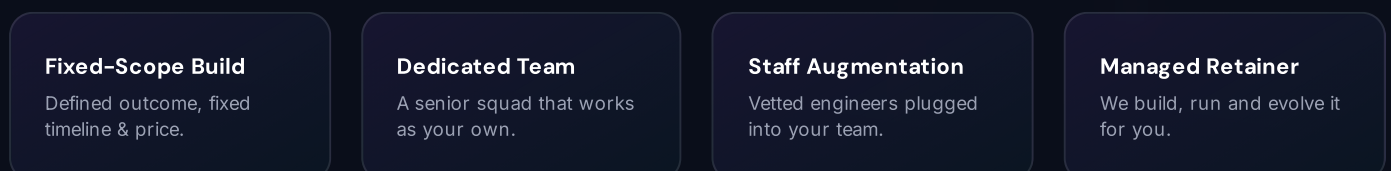

What's in scope

- ✓ Dedicated technical project manager
- ✓ Embedded QA engineers with automated test coverage
- ✓ Shared sprint dashboard and delivery reporting
- ✓ Full source-code and IP ownership from day one
- ✓ Senior-engineer-led architecture and code review
- ✓ Dedicated DevOps: CI/CD, infrastructure, 24/7 monitoring
- ✓ Formal SLA and confidentiality agreement
- ✓ Direct access to every team member — no gatekeepers

How you start

Ways to engage

03 · WHAT CHANGES FOR YOU

What you can expect

Delivery speed that compounds every sprint instead of resetting with each departure

One accountable partner instead of a scatter of contractors to chase

Security and governance built in — nothing extra to hire or bolt on

Your code, data, and IP stay yours as the product and team scale

Products we run at scale

Common questions

How is this different from freelancers or staff augmentation?

Freelancers plug into your team and leave. You get a complete unit — engineering, QA, DevOps — that we manage end to end and that stays for years. You direct the roadmap; the management burden is ours.

Who owns the code and IP?

You do — every repository, architecture decision, and deployment artifact, from day one. Nothing is withheld and there is no lock-in. If you ever leave, everything goes with you.

Can the team scale, and what if someone leaves?

Squads grow from a small founding team to a full multi-team group without a re-hiring cycle. If someone leaves, we handle replacement and knowledge transfer inside the squad. Your cadence and domain knowledge stay intact.

How do we start?

With a free assessment — no cost, no obligation. We map your roadmap and the squad you need. Then a fixed-scope first build goes live in about 2-3 weeks — real delivery before you commit long term. From there the team runs and expands with you.

Book your free assessment

Free assessment → fixed-scope first build, live in ~2-3 weeks → run & expand.

No cost, no obligation. Full profile: rapinova.com/resources
