

ENTERPRISE ERP · SERVICE PROFILE

Custom ERP Development

Get an ERP shaped around how you actually work. Finance, HR, inventory and operations in one system — with the code, data and IP owned by you.

10,000+ systems delivered for clients in 150+ countries — and we run our own 17-brand company on systems like this. You own everything we build.

PROVEN ON US

rnaccounts, our own cloud ERP & POS, runs 140+ organisations every day. Which means your ERP is built by a team that operates one at scale.

01 · THE COST YOU PAY TODAY, AND THE FIX

WHAT IT COSTS YOU TODAY

Every month, a rigid ERP costs you real money. Your team wastes hours on workarounds and shadow spreadsheets. Per-seat fees climb as you grow. Reports arrive late, so decisions run on stale numbers. And compliance blind spots hide between systems — until an audit finds them first.

WHAT YOU GET INSTEAD

You get an ERP built around your real processes, not a template. AI reads your documents and reporting runs on live data. We have built business systems for 19+ years and run our own cloud ERP daily. Which means fewer workarounds, faster reporting, and a system you fully own — code, data and IP.

What you get

01

Works the Way You Do

Your finance, HR, inventory, procurement, CRM and project workflows come first. Each module is built around them. Which means no workarounds and no shadow spreadsheets.

02

Answers From Your Own Data

AI agents read your invoices, contracts and records and answer with sources — grounded in your own ERP data. Which means fast answers your team can actually verify.

03

Audit-Ready by Default

Granular role-based access and full audit trails are built in from day one. Which means you face compliance checks in finance, healthcare or manufacturing without scrambling.

04

Decide on Live Numbers

Dashboards and reports pull live data, not yesterday's exports. Which means every decision you make runs on what is happening now.

05

Grows With Your Business

Runs across multiple entities and business units, with 200+ integrations to banks, payment gateways and your tools. Which means growth never forces a rebuild.

06

You Own It All

You get full source code and IP, plus optional 24/7 monitored operations after launch. Which means no lock-in, and someone watching your system while you sleep.

YOU OWN IT | Everything we build — code, data and IP — is yours. Which means no lock-in, ever.

02 · WHAT'S IN SCOPE

What's in scope

- ✓ Discovery of your real business workflows
- ✓ Phased build — core modules live first
- ✓ Role-based access & audit trail setup
- ✓ Full source-code & IP handover to you
- ✓ Module architecture & system design
- ✓ Data migration from your existing systems
- ✓ Team training & parallel-run rollout
- ✓ Optional 24/7 monitoring & support

How you start

1

Free assessment

We map your problem and scope the first build. No cost, no obligation.

2

First build

Fixed scope, fixed timeline. Live in about 2–3 weeks.

3

Run

We operate, monitor and support it 24/7. You see it working under real use.

4

Expand

You add the next system when you're ready. Nothing forced.

Ways to engage

Fixed-Scope Build

Defined outcome, fixed timeline & price.

Dedicated Team

A senior squad that works as your own.

Staff Augmentation

Vetted engineers plugged into your team.

Managed Retainer

We build, run and evolve it for you.

03 · WHAT CHANGES FOR YOU

What you can expect

Your team stops fighting the system — workflows run the way your business actually works

One connected system across finance, HR, inventory and operations, reporting on live data

AI built in to cut manual admin overhead 40–70% as you automate document-heavy work

You own the code, data and IP outright — no per-seat fees, no vendor lock-in

Common questions

Do we own the source code?

Yes. You get full source-code and IP ownership on every engagement. Your data stays yours too. Which means no lock-in, no black boxes, and no forced renewals if you ever want to take it in-house.

Can we use AI without our data leaving our servers?

Yes. Where data sovereignty matters, we deploy private, self-hosted AI models inside your own infrastructure. Your documents never leave your servers. Which means you get AI answers without a compliance headache.

Which modules can the ERP include?

Finance, HR, inventory, procurement, CRM and project management. Each is an independent module. You start with the modules that hurt most and add the rest as you grow.

How do we start?

With a free assessment of your current systems and workflows — no cost, no obligation. If it makes sense, we agree a fixed scope, and your first build goes live in about 2-3 weeks. Then we run it and expand module by module. No surprise bill.

Book your free assessment

Free assessment → fixed-scope first build, live in ~2–3 weeks → run & expand.
