PROVEN ON US

rnaccounts, our own cloud ERP & POS, runs 140+ organisations. Which means the team implementing yours runs an ERP for real businesses daily.

01 · THE COST YOU PAY TODAY, AND THE FIX

WHAT IT COSTS YOU TODAY

A stalled ERP costs you every month. Your team double-enters data into spreadsheets. Reports arrive late and nobody trusts the numbers. Decisions wait while departments reconcile figures by hand. And you keep paying for a system your people avoid.

WHAT YOU GET INSTEAD

You get workflows mapped and data cleaned before any module is configured. Then a phased go-live, with a rollback path at every step. We build ERP software ourselves and customise at code level. Which means the system bends to your business — not the other way round.

What you get**01****A system that fits you**

We map every workflow and decision point before configuring anything. Which means your ERP fits how you actually operate, not a template you must bend to.

02**Your data arrives clean**

Your historical data is extracted, cleaned, validated and reconciled before go-live. Which means you start with numbers your team trusts from day one.

03**Connects to what you run**

Your ERP links to banking, CRM and operations tools through 200+ integrations, customised at code level. Which means no more re-typing data between systems.

04**Go live without stopping**

You roll out department by department, with parallel running and a defined rollback path. Which means your business never stops to accommodate the system.

05**Your whole team ready**

Every role gets hands-on training built for its daily tasks. Which means adoption spreads across your team instead of resting on a few power users.

06**Help stays after launch**

A dedicated support team stays through the critical weeks after go-live, 24/7, then into daily operations. Which means problems get fixed before they cost you money.

YOU OWN IT | Everything we build — code, data and IP — is yours. Which means no lock-in, ever.

02 · WHAT'S IN SCOPE

What's in scope

- ✓ Current-state assessment and gap analysis
- ✓ Data extraction, cleansing and migration
- ✓ Connections to banking, CRM and other systems
- ✓ Role-based training for every user group
- ✓ Phased implementation roadmap with timeline
- ✓ Custom configuration and workflow build-out
- ✓ User acceptance testing on real scenarios
- ✓ Dedicated post-go-live support team

How you start

1

Free assessment

We map your problem and scope the first build. No cost, no obligation.

2

First build

Fixed scope, fixed timeline. Live in about 2–3 weeks.

3

Run

We operate, monitor and support it 24/7. You see it working under real use.

4

Expand

You add the next system when you're ready. Nothing forced.

Ways to engage

Fixed-Scope Build

Defined outcome, fixed timeline & price.

Dedicated Team

A senior squad that works as your own.

Staff Augmentation

Vetted engineers plugged into your team.

Managed Retainer

We build, run and evolve it for you.

03 · WHAT CHANGES FOR YOU

What you can expect

One system of record replaces spreadsheets and disconnected tools

Clean, validated data your team actually trusts

Faster decisions from real-time visibility across departments

A go-live your business barely notices, because the rollout was planned around it

Products we run at scale

Common questions

Do you implement your own ERP or third-party systems?

Both. We implement our own ERP platforms and third-party systems. You get the one that fits your business — we recommend on fit, not on what we sell.

What happens to our existing data?

It moves with you. Every project includes extraction, cleansing, transformation and validation, with reconciliation before go-live. So your history arrives intact — and you own your data and any custom code we write.

Will we have to stop work during go-live?

No. You go live phase by phase, department by department, with parallel running and a defined rollback path. Your operations continue while the new system comes online.

How do we start?

With a free assessment of your workflows and data — no cost, no obligation. You then get a fixed-scope first build, live in about 2-3 weeks, with no surprise bill. From there we run it with you and expand phase by phase.

Book your free assessment

Free assessment → fixed-scope first build, live in ~2-3 weeks → run & expand.
