

TECHNOLOGY ADVISORY · SERVICE PROFILE

IT Consulting & Advisory

Make your next architecture, stack and security call the right one. Advice from engineers who build and run what they recommend.

10,000+ systems delivered for clients in 150+ countries — and we run our own 17-brand company on systems like this. You own everything we build.

INTEGRATIONS BUILT

PROVEN ON US

Advice from operators: we run a 17-brand group on our own stack. Which means recommendations we already live with ourselves.

01 · THE COST YOU PAY TODAY, AND THE FIX

WHAT IT COSTS YOU TODAY

One wrong platform choice locks you into years of cost and rework. Every month without senior technical direction, your team builds on guesses. A full-time CTO is hard to justify. And most advisors hand you a deck, bill you, and leave before anything is tested.

WHAT YOU GET INSTEAD

You get engineers who have shipped 10,000+ systems reviewing your architecture, stack and security choices. The same team stays on as your part-time CTO through execution. Which means every recommendation is tested in your real build — not left in a deck.

What you get

01

Know What to Fix First

A full review of your current systems against where your business is going, with a prioritised roadmap. Which means you fix what matters first, not what shouts loudest.

02

Choose Vendors Without Regret

Vendor-neutral guidance on platforms, infrastructure and AI, judged against your team, scale and budget. Which means you buy what fits you — not what pays a commission.

03

Find Gaps Before Attackers Do

Vulnerability assessment, penetration testing and compliance review for systems holding sensitive data. Which means you close weak points before they become an incident.

04

Move to Cloud Without Downtime

A sequenced migration strategy and execution plan built for zero-downtime cutover. Which means your customers never notice the move — only the improvement.

05

Modernise Without Breaking Things

A step-by-step plan to modernise legacy systems, adopt cloud and automate manual work. Which means your team spends less time on repetitive tasks each month.

06

A CTO Without the Salary

Ongoing technical direction, architecture oversight, vendor checks and team mentoring on retainer. Which means CTO-level judgment without a CTO-level salary.

YOU OWN IT | Everything we build — code, data and IP — is yours. Which means no lock-in, ever.

02 · WHAT'S IN SCOPE

What's in scope

- ✓ Current-state architecture assessment
- ✓ Vendor-neutral technology evaluation
- ✓ Cloud migration strategy and execution plan
- ✓ Executive-ready findings presentation
- ✓ Prioritised improvement roadmap
- ✓ Security and compliance audit findings
- ✓ Build-vs-buy recommendation with cost model
- ✓ Optional CTO-as-a-Service retainer

How you start

1

Free assessment

We map your problem and scope the first build. No cost, no obligation.

2

First build

Fixed scope, fixed timeline. Live in about 2–3 weeks.

3

Run

We operate, monitor and support it 24/7. You see it working under real use.

4

Expand

You add the next system when you're ready. Nothing forced.

Ways to engage

Fixed-Scope Build

Defined outcome, fixed timeline & price.

Dedicated Team

A senior squad that works as your own.

Staff Augmentation

Vetted engineers plugged into your team.

Managed Retainer

We build, run and evolve it for you.

03 · WHAT CHANGES FOR YOU

What you can expect

Technology decisions you can defend — backed by people who ship

One roadmap your leadership and engineering both commit to

Senior technical judgment without a full-time salary

Fewer expensive missteps on architecture, vendors and security

Products we run at scale

ServerAdmin.ai

AI server management

Common questions

Do we just get a report, or do you help us execute?

Both. You get a concrete, prioritised roadmap first. Then, if you want, our CTO-as-a-Service keeps the same engineers engaged through execution. Which means the advice does not end at the workshop.

Are your recommendations tied to any vendor?

No. Our guidance on platforms, infrastructure and AI is vendor-neutral. Every option is judged against your team, scale and budget — never against a partner commission.

How does CTO-as-a-Service work?

You get senior technical leadership on a monthly retainer. That covers direction, architecture oversight, vendor evaluation and team mentoring. You pay a fraction of a full-time CTO's cost and can stop when you no longer need it.

How do we start?

With a free assessment of your systems and goals — no cost, no obligation. If you go ahead, we agree a fixed scope, so there is no surprise bill. Your first build goes live in about 2-3 weeks. Then we run it and expand from there.

Book your free assessment

Free assessment → fixed-scope first build, live in ~2-3 weeks → run & expand.
